Included in your
Radio Motor box

RADIO MOTOR IS SHIPPED IN SEPARATE BOX.

1

Plug the ribbon cable with a dual bank Molex connector from the Radio Motor into the Radio Face(1a).

1.a
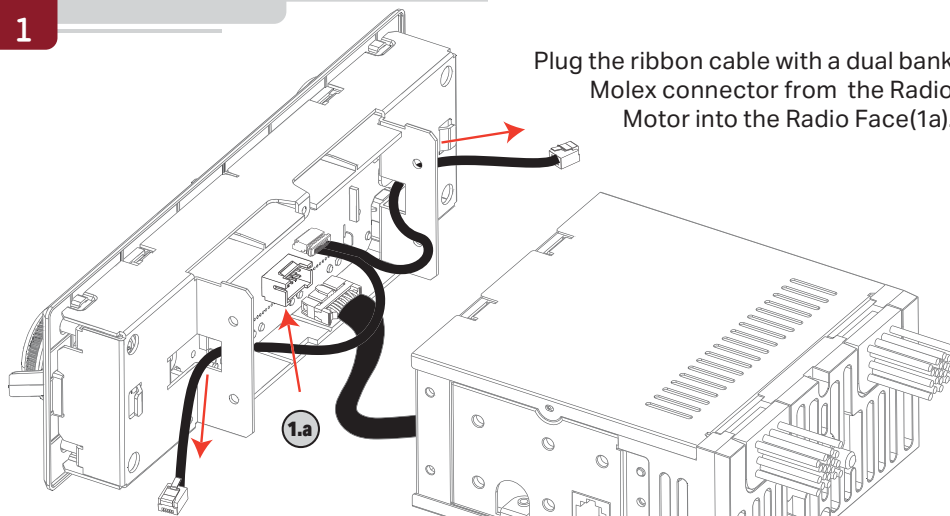

Make sure each end of the Radio Face Y-Connector is routed through the openings in the metal housing of the radio face.

If your **MOTOR INCLUDES A SECOND HARNESS** with a single bank Molex connector, you may remove the Radio Face Y-Harness and attach the second harness from the Motor to the Radio Face in it's place.

If using the Radio Face Y-Harness

Before attaching the DIN Brackets, feed the cable from the
Radio Face **(3.a)** through the left and right DIN Bracket **(E)**.

Using the 8 screws **(B)** included in the Radio Motor box, install the DIN
Brackets **(E)** to the sides of the Radio Motor. Adjust the brackets forward until they
meet the back of the radio face.

Be careful not to bend the brackets to ensure proper fitment into the DIN Sleeve.
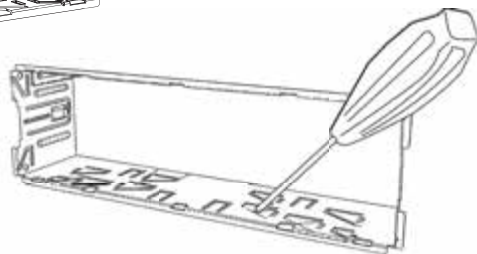

If using the Radio Face Y-Harness

 Plug the cable from the Radio Face into each side of the Radio Motor **(3.b).**

4

Insert the DIN Sleeve**(G)** into your dash opening.

G

Using a screwdriver, push down the sleeve tabs on all four sides of the DIN Sleeve to secure it into the dash opening.

Before moving on to the next step it is advised to refer to the Installation Assembly Manual for DIN Solutions Radios for information on connecting the main wiring harness.

5
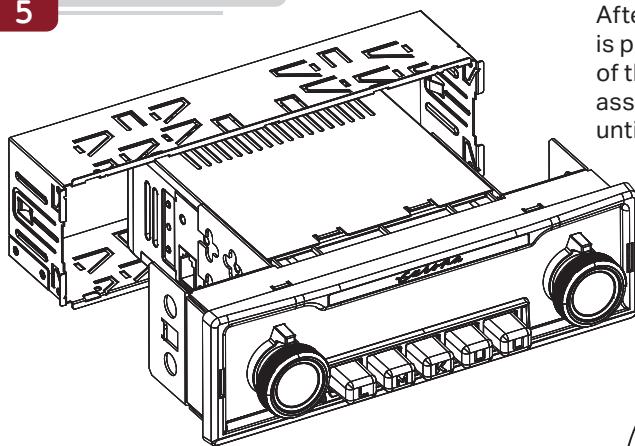

After the main wiring harness is plugged into the back of the radio slide the radio assembly into the DIN Sleeve until the unit clicks into place.

Install one of the included knob sets onto the right and left control shafts.
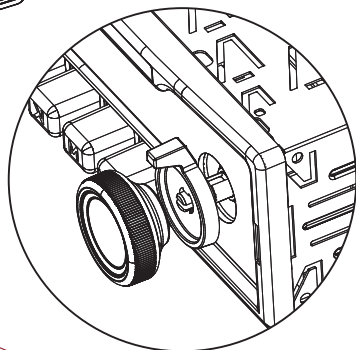

RetroSound®

6
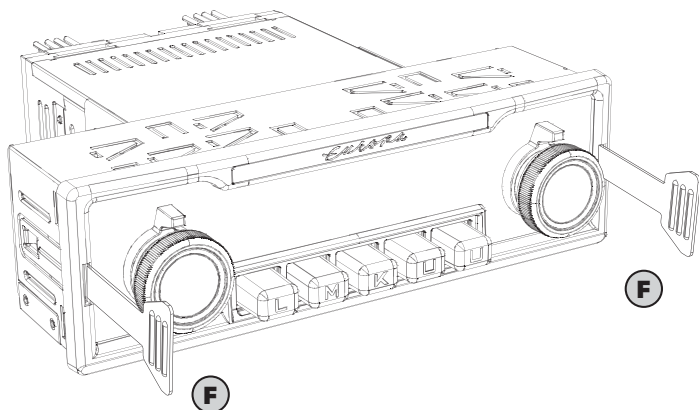

If adjustments are needed, use the included DIN Keys **(F)** to remove the assembly from the DIN Sleeve.

7

Once the Radio is mounted correctly, install the backstrap to the rear of the radio. Follow the installation instructions included with your Radio Motor.
